EDUCATION

University of Virginia

B.S. in Computer Science, Minors in Civil Engineering + Engineering Business
3.96 GPA

Charlottesville, VA

Aug. 2023 – May 2027

Paul VI High School

Class Salutatorian

Chantilly, VA

Aug. 2019 – May 2023

EXPERIENCE

Undergraduate Technical Intern

May 2026 – Present

VeriSign

Reston, VA

- Developed an online tool to allow developers to assign ownership to thousands of previously unassigned products
- Pulled data on *Redacted for public resume* from monitoring sites using GraphQL
- Extended an internal dashboard to clearly track teams' progress on *Redacted for public resume*
- Wrote and improved system architecture documentation to assist developers in future improvements to software

Software Development Intern II

Dec 2024 – Jan 2026

TrEd Solutions Corporation

Manassas, VA

- Developed tools to prevent the monitoring of devices over *Redacted for public resume*
- Created Bash scripts to harden Linux hosts against *Redacted for public resume*
- Applied systems engineering skills to develop preliminary systems architecture for networking software
- Researched novel techniques to *Redacted for public resume* of deployments of large-scale software systems

Software Developer Intern

June 2023 – Aug 2024

Technology Research Enterprise Development

Manassas, VA

- Developed a high-performance parser in Go to *Redacted for public resume*
- Maintained a MySQL database of *Redacted for public resume*
- Visualized complex graph relationships by developing a full-stack application using React and Go
- Produced design documents and diagrams to accurately present architecture decisions to non-technical management

PROJECTS

Ghost Tour Webmaster | *JavaScript, MySQL, Azure, GitHub CI/CD, NodeJS, React, CSS*

- Deployed and maintained an interactive website for a Charlottesville and UVA ghost tour service
- Created a full-stack web application with MySQL, Node, and React to allow users to sign up for tours
- Hastened deployment for quick updates using DevOps technologies such as GitHub CI/CD and Azure Services

UVACodes | *Go, React, SQL, CSS, Azure, GitHub CI/CD*

- Developed a full-stack web app in Go + React to help hundreds of students instantly share university meal codes
- Implemented secure RESTful sign-in and food reporting APIs using MySQL and GoMux
- Maintained and upgraded backend via CI/CD pipelines, achieving 99 % uptime and fast, reliable deployments

Smart Building Air Quality Classifier | *Python, InfluxDB, SparQL, Jupyter*

- Monitored the effects of large gatherings on IAQ by ingesting millions of data points from IoT sensors
- Classified tens of thousands of meetings over five years into categories using ML techniques to pair with IAQ data
- Developed Python scripts to visualize CO_2 and VOC emission patterns of meetings in the UVA Link Lab

TECHNICAL SKILLS

Languages: Golang, JavaScript, PHP, Java, C, SQL, GraphQL, Python, Bash, HTML/CSS, Zig

Frameworks: React, Svelte, GoMux, Django, Tailwind, JUnit, Material-UI, jQuery

Developer Tools: Linux, Command Line, Git (GitHub/GitLab), Docker, Microsoft Azure, JetBrains, Jupyter

Non-Technical Hobbies: Marching Band, Fencing, Cartography, Orchestra, Football, Urban Planning, History
